PROJECTS

Hotel Room Booking

Developed a Dynamic and Responsive website using HTML, CSS, JS, SQL ,and PHP, implementing CURD operations. The project seamlessly manages data with SQL databases, offering users Create, Read, Update, and Delete functionalities within a user-friendly interface.

Allows users to edit Their Booking Details and also user have the ability to cancel Bookings.

Food Order Application

1. Dynamic React-based Online Food Order app allowing users to explore a diverse recipe catalog.

2. User-friendly interface facilitates the addition of multiple dishes to orders, ensuring a seamless experience.

3. Implemented Redux for state management and React Router for seamless navigation.

4. Allow Users to edit and update the Personal Informations .
